

Right Care Initiative Bay Area/Silicon Valley University of Best Practices
March 26, 2019, 4:00 to 6:30 p.m. PST (4:00 Check in; 4-6:30 Program; 6:30 Reception)
Stanford Neuroscience Health Center

Right Care Initiative Bay Area/Silicon Valley Goal: Drive Toward Zero Preventable Heart Attack, Stroke, and Diabetes Deaths & Disabilities through best available science combined with proactive screening & outreach

Achieve 80% in good control, or "A Grade" (90th Percentile) HEDIS levels for Cardiovascular Disease and Diabetes, whichever is greater.
Priorities:

- 80% of hypertensive patients with blood pressure (BP) controlled: <140/90 mm Hg
80% of diabetic patients with blood sugar controlled: Hemoglobin A1c<8
80% of patients with diabetes and/or cardiovascular conditions on appropriate cholesterol therapy (proxy, LDL controlled: LDL-C<100mg/dL)
Proactive Community Outreach to Screen & Identify Vulnerable Patients to Connect to Treatment & Support

At all Right Care Initiative gatherings, we follow the Warren Barnes' Principle:
We compete against disease and not each other.

4:00 - 4:30 p.m. Check-In, Snacks and Libations

4:30 - 4:35 p.m. Co-Chair Vision & Welcoming Remarks

Nirali Vora, MD - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Associate Prof., Neurology, School of Medicine, Stanford University; Director, Global Health Neurology; Program Director, Adult Neurology Residency, School of Medicine, Stanford University

Eveline Stock, MD - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Prof., Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of California, San Francisco

Hattie Rees Hanley, MPP - Director and Co-Founder, Right Care Initiative, UC Berkeley School of Public Health, Center for Healthcare Organizational and Innovation Research (CHOIR)

4:35 - 4:45 p.m. Around the Room Introductions

4:45 - 5:15 p.m. Updates from the World of Cardiology

Eveline Stock, MD - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Prof., Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of California, San Francisco

5:15 - 5:20 p.m. Q&A Session

5:20 - 5:50 p.m. Technology and AI in Cardiology

Tatyana Kanzaveli - Founder and CEO, Open Health Network

5:50 - 6:00 p.m. Q&A Session

6:00 - 6:15 p.m. Break Out Groups (within room to save time)

6:15 - 6:30 p.m. Around-the-Room Action Discussion: Quest to Get to Zero Preventable Heart Attacks, Strokes & Diabetes Deaths and Disabilities

6:30 p.m. Please join us for a heart healthy reception

A Big Thank You to Stanford University for hosting the Right Care Initiative!

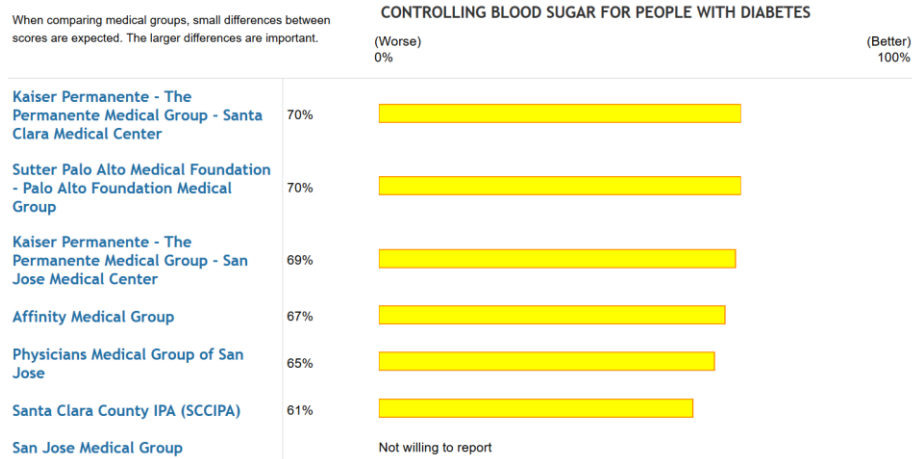

Publicly Available Performance Data from California Office of The Patient Advocate

Health Care Quality Report Cards 2018-19 Edition

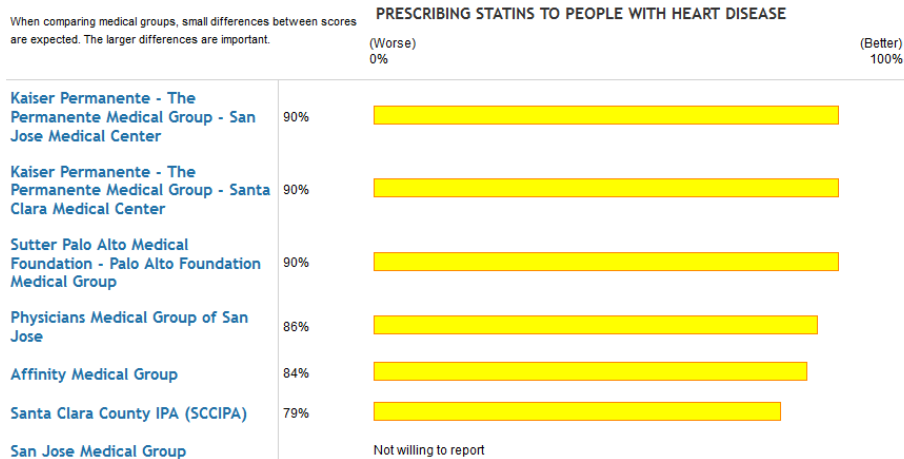

Santa Clara County

Why is it important to manage blood pressure if you have hypertension?
 Hypertension, or high blood pressure, makes the heart work harder. This increases your risk for heart disease and other serious health conditions such as a heart attack, stroke, and kidney damage.

Why is it important to control blood sugar if you have diabetes?
 Diabetes increases your risk for high blood pressure and heart disease. High blood pressure makes the heart work harder and can lead to heart disease, stroke, and kidney damage.

Why is it important for patients with cardiovascular disease to receive statin therapy?
 Statins are a type of medicine that bring down cholesterol levels in the blood. The American College of Cardiology and American Heart Association recommend the use of statins with moderate to high intensity for adults with cardiovascular disease.
