

**Right Care Initiative Silicon Valley/San Francisco Bay Area
University of Best Practices — March 26, 2019**

Eveline Oestreicher Stock, MD

Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Professor, Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of California, San Francisco

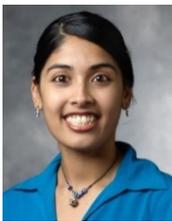

Dr. Stock's expertise in Endocrinology and Cardiology at the University of California San Francisco have informed her exciting work in molecular cardiology. Dr. Stock is a leader in the field of lipoprotein metabolism, and the diagnosis and management of lipoprotein disorders for the prevention of atherosclerotic coronary heart disease. Her research interests include the role of lipoprotein subclasses as predictors of coronary artery disease and myocardial infarction. She is an Assistant Professor at UCSF, a practicing cardiologist and lipidologist, and a researcher at the Cardiovascular Research Institute at UCSF. She received her medical education at the Catholic University of Chile and completed her training in endocrine hypertension and residency at Harvard Medical School's Massachusetts General Hospital. She looks forward to continuing to work with the Right Care Initiative as a means of closing the gap between science and practice to get to zero heart attacks and stroke, especially in vulnerable populations.

Tatyana Kanzaveli

Founder and CEO, Open Health Network

Tatyana Kanzaveli began as a programmer and has since held roles as a senior executive within large multinational companies and startups. Through her personal journey as a cancer survivor, she became motivated to help patients and is now the founder and CEO of Open Health Network, a healthcare startup in Big Data, Blockchain and Artificial Intelligence. Tatyana and her team developed an app called "My Cardiac Coach" for the American Heart Association. "My Cardiac Coach" allows patients to track health data, learn, manage medications and find local cardiac rehab centers. Tatyana is a mentor at 500Startups and the Richard Branson Entrepreneurs Centre and serves on boards for private companies. She often speaks at conferences on innovation, entrepreneurship and digital health, and is also a licensee and organizer of the TEDxBayArea conference. Tatyana Kanzaveli was a USSR chess champion, and teammate of Gary Kasparov.

Nirali Vora, MD

Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Associate Professor, Neurology, School of Medicine, Stanford University; Director, Global Health Neurology; Program Director, Adult Neurology Residency, School of Medicine, Stanford University

Nirali Vora is a board-certified stroke neurologist, Associate Professor at Stanford, and a faculty affiliate of the Clinical Excellence Research Center. She provides comprehensive care for stroke and transient ischemic attack (TIA) patients, especially those with "cryptogenic" or undetermined cause for their disease. She has pioneered initiatives to improve stroke care through systems change and education on a regional and global level, including development of the first stroke unit in Zimbabwe. She is the Director of the Stanford Global Health Neurology program, as well as the Program Director of the Adult Neurology Residency Training program. She looks forward to continuing to work with patients and providers to prevent and better manage stroke, eliminate disparities in health care, and improve global neurology education.

Hattie Rees Hanley, MPP

Director and Co-Founder, Right Care Initiative, UC Berkeley School of Public Health, Center for Healthcare Organizational and Innovation Research (CHOIR)

Ms. Hanley co-conceived of and launched the Right Care Initiative in 2007 with the deans of the University of California, Berkeley and UCLA's Schools of Public Health, clinical experts, and State of California leadership to improve patient outcomes in high yield areas for preventing disability and death, where the science is clear, but the uptake is uneven. The Right Care Initiative is a public-private, charitably-funded collaborative effort that has thus far worked in the areas of prevention and better management of Hospital Acquired Infections (HAI), heart attacks, strokes, diabetes and heart failure. Ms. Hanley has directed the initiative since its inception, co-creating the intellectual framework through close collaboration with leading academics and experts in the field. The hallmark of her public policy career is bridging across the disparate arenas of health care delivery, science, academia, business and government. Ms. Hanley received her Master's degree in Public Policy from Harvard University's John F. Kennedy School of Government, after studying health economics and pre-medical coursework at UC Davis. Since that time, she has applied her background in science and public policy in the areas of clinical quality improvement, public health preparedness and improving laws to protect patients. She was instrumental in the negotiations and passage of the set of California laws known as the Patient Bill of Rights, which includes rights to Second Medical Opinions and Independent Medical Review. The Right Care Initiative is a program within the UC Berkeley School of Public Health's Center for Health Organizational and Innovation Research (CHOIR).
