Berkeley Public Health

Right Care Initiative Capital Region University of Best Practices

April 8, 2019, 11:30 to 2:00 p.m. PST

(Networking lunch served at 11:30 a.m.)

Sierra Health Foundation, 1321 Garden Highway, Sacramento, CA 95833

Right Care Initiative Goal: Reduce the interval between scientific advances and practical implementation in high-yield areas to prevent disability and death, with current focus on the prevention and better management of heart disease, strokes and diabetic complications.

Achieve 75 % in good control, or "A Grade" (90th Percentile) HEDIS levels for Cardiovascular Disease and Diabetes, whichever is greater.

2019 priorities:

- + 75% of hypertensive patients with blood pressure (BP) controlled: <140/90 mm Hg***
- + 75% of diabetic patients with blood sugar controlled: Hemoglobin A1c<8***
- + In absence of HEDIS cardiovascular disease lipid control 90th percentile target, Right Care Initiative 2019 target:***
- + 75% of patients with diabetes and/or cardiovascular conditions on appropriate cholesterol therapy (proxy, LDL controlled: LDL-C<100mg/dL). In very high-risk ASCVD, use a LDL-C threshold of 70 mg/dL.***

12:00 - 12:10 p.m.
