

## Eveline Oestreicher Stock, MD

**Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Professor, Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of California, San Francisco**

Dr. Stock's expertise in Endocrinology and Cardiology at the University of California San Francisco have informed her exciting work in molecular cardiology. Dr. Stock is a leader in the field of lipoprotein metabolism, and the diagnosis and management of lipoprotein disorders for the prevention of atherosclerotic coronary heart disease. Her research interests include the role of lipoprotein subclasses as predictors of coronary artery disease and myocardial infarction. She is an Assistant Professor at UCSF, a practicing cardiologist and lipidologist, and a researcher at the Cardiovascular Research Institute at UCSF. She received her medical education at the Catholic University of Chile and completed her training in endocrine hypertension and residency at Harvard Medical School's Massachusetts General Hospital. She looks forward to continuing to work with the Right Care Initiative as a means of closing the gap between science and practice to get to zero heart attacks and strokes, especially in vulnerable populations.
