

**Rhonda McClinton-Brown, MPH**

**Director, Healthy Communities Branch, Santa Clara County Public Health Department**

Rhonda McClinton-Brown has more than 25 years of experience in the field of community health and is currently the director of the Health Communities Branch of the Santa Clara County Public Health Department. In her role, Rhonda organizes, coordinates and evaluates the County's Healthy Communities programs and maintains current data to assess the health of the population. Because of her unique position, Rhonda works closely with the County's efforts related to Chronic Disease and Injury Prevention, Nutrition & Obesity Prevention, Traffic Safety, and Tobacco Prevention.

Before working at the County Public Health Department, she spent 12 years as the executive director for Community Health Partnership where she advocated for affordable and accessible health services for the diverse and multicultural communities of Santa Clara and San Mateo Counties. Afterwards, she transitioned into Stanford's School of Medicine as the Executive Director of their Office of Community Health. In 2012, Rhonda received the Inspiring Change Leadership Award for her exceptional commitment and ability in enhancing the health and wellbeing of her local communities.

# Santa Clara County COVID-19 Cases Dashboard

Data last updated April 27, 2020

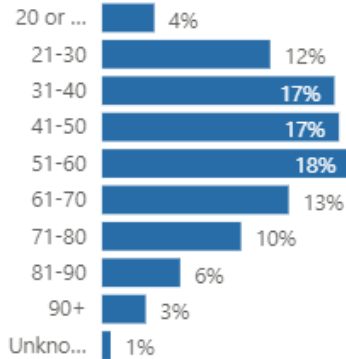

This dashboard provides detailed data on cases of COVID-19 in Santa Clara County. Due to limited testing capacity, the information reported represents only a small sample of the likely total COVID-19 cases in Santa Clara County. Increased testing availability is expected to increase the number of confirmed COVID-19 cases reported.

Total Cases <b>2105</b>	New Cases <b>23</b>	Total Deaths <b>103</b>	New Deaths <b>3</b>	Currently Hospitalized <b>172</b>	Page Navigation <a href="#">→ Death Data</a>

### Cumulative Cases by Gender

### Cumulative Cases by Age Group

### Cumulative Cases by Specimen Collection Date

Values for the most recent 5 days will likely increase as additional results are received.

### New Cases by Specimen Collection Date

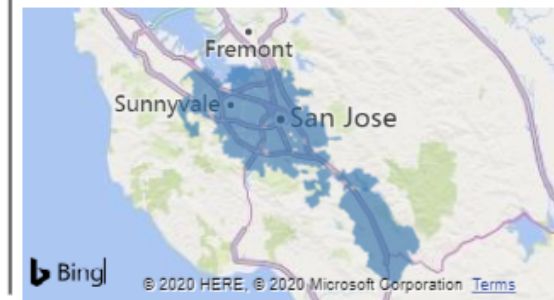

Values for the most recent 5 days will likely increase as additional results are received.

### Cumulative Cases by Race/Ethnicity

Race/Ethnicity	Percent of Cases	Percent of Population
African American	2%	2%
Asian/Pacific Islander	23%	33%
Latinx/Hispanic	37%	27%
Other	4%	3%
Unknown	16%	0%
White	18%	34%
<b>Total</b>	<b>100%</b>	<b>100%</b>

### Cumulative Cases by City

Source: California Reportable Disease Information Exchange, California Department of Finance.

Note: The graphs do not include 26 patients that did not have a valid date for when their specimen was collected. These patients are included in the total numbers presented above. Case counts for cities with less than 10 cases are not provided. Currently hospitalized includes suspected cases. New cases represent newly identified cases since last reporting. Specimen collection date may vary. Other category on race/ethnicity graph includes American Indian/Alaska Native.

## Cumulative Deaths by Gender

## Cumulative Deaths by Age Group

## Deaths by Presence of Underlying Health Conditions

## Death by Race/Ethnicity

Other group includes American Indian and deaths without a known race/ethnicity

Source: California Reportable Disease Information Exchange

Note: Deaths provided in this dashboard do not necessarily mean that the individual died from COVID-19. New deaths represent newly identified deaths since last reporting. Other category on race/ethnicity graph includes American Indian/Alaska Native.

## Case Count by City (April 27, 2020)

Community transmission is believed to be widespread throughout Santa Clara County. Limited testing capacity means case counts represent only a small portion of actual cases within each city.

Campbell	Cupertino	Gilroy	Los Altos	Los Altos Hills	Los Gatos	Milpitas	Monte Sereno
29	26	39	22	<10	22	73	<10
Morgan Hill	Mountain View	Palo Alto	San Jose	Santa Clara	Saratoga	Sunnyvale	Other/Unknown

# Santa Clara County COVID-19 Testing Dashboard

Data last updated April 27, 2020

This dashboard shows the overall daily testing volume for COVID-19 in Santa Clara County. Testing is carried out by the Santa Clara County Public Health Lab as well as other academic and commercial facilities. The positivity rate is the percentage of individuals tested that had COVID-19 and does not include results that are pending. The average days turnaround time is the average amount of time between the date the specimen was collected and the date the results came back. Some negative labs may include multiple specimens collected from the same patient. Testing results are displayed according to the date of the results.

Total Patients Tested	Positive Results	Negative Results	Pending Results	Test Positivity Rate (%)	Average Days Turnaround Time
25575	2105	23203	267	8.23	1.75

## Individuals Tested in the Last 40 Days

● Positive Results ● Negative Results ● Pending Results

Data are reported as they are received. Values for the most recent 5 days will likely increase as additional results are received.
