

## RIGHT CARE INITIATIVE *Clinical Quality Improvement Leadership Collaborative*

Right Care Initiative Statewide Goal: *Drive Toward Zero Preventable Heart Attack, Stroke, Diabetes, and Heart Failure Deaths & Disabilities Through Best Available Science Combined with Proactive Screening & Outreach*

*Achieve 80 % in good control, or "A Grade" (90th Percentile) HEDIS levels for Cardiovascular Disease and Diabetes, whichever is greater.*  
Priorities:

- ⬇ 80% of hypertensive patients with blood pressure (BP) controlled: <140/90 mm Hg (Optimally 130/80 mm Hg per 2017 American College of Cardiology Guidelines, endorsed by ACC/AHA/AAPA/ABC/ACPM/AGS/APhA/ASH/ASPC/NMA/PCNA)*
- ⬇ 80% of diabetic patients with blood sugar controlled: Hemoglobin A1c<8*
- ⬇ 80% of patients with diabetes and/or cardiovascular conditions on appropriate cholesterol therapy (proxy, LDL controlled: LDL-C<100mg/dL)*
- ⬇ Proactive Community Outreach to Screen & Identify Vulnerable Patients to Connect to Treatment & Support*

4:00 – 4:10 p.m.

### *Chairperson's Welcome and Statewide Updates*

**Nirali Vora, MD** - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Associate Prof., Neurology, School of Medicine, Stanford University; Director, Global Health Neurology; Program Director, Adult Neurology Residency, School of Medicine, Stanford University

**Eveline Stock, MD** - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Prof., Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, UCSF

**Robert Kaplan, PhD** - Research Director, Clinical Excellence Research Center, Stanford University; Former Chief Science Officer US HHS AHRQ; Right Care Initiative Technical Expert Group; Former Associate Director, National Institutes of Health

**Edward M. Yu, MD, CMQ, CPPS, CPE** - Chief Quality Officer, Palo Alto Medical Foundation

**Hattie Rees Hanley, MPP** - Director & Co-Founder, Right Care Initiative, Center for Healthcare Organizational and Innovation Research, UC Berkeley School of Public Health

Berkeley Public Health

CHOIR CENTER FOR HEALTHCARE ORGANIZATIONAL INNOVATION RESEARCH

Stanford MEDICINE

UCSF University of California San Francisco

blue california

4:10 – 5:00 p.m.  
(5 min Q & A)

**Updates on Cardiovascular Complications in Patients with COVID-19**

**June-Wha Rhee, MD, FACC** – Practicing Cardiologist with Specialty in Cardio-oncology; Instructor, Stanford Cardiovascular Institute, Stanford University School of Medicine

5:00 – 5:20 p.m.  
(5 min Q&A)

**UCSF Pharmacist on the Care team: A Focus on Inter-Professional Telehealth**

**Marylin Stebbins, PharmD** – Professor and Vice-Chair of Clinical Innovation, Department of Clinical Pharmacy, University of California, San Francisco

5:20 – 5:40 p.m.  
(5 min Q&A)

**Re-Engaging Patients in the Era of the COVID Pandemic**

**Edward M. Yu, MD, CMO, CPPS, CPE** – Chief Quality Officer, Palo Alto Medical Foundation

5:40 – 6:00 p.m.

**Q&A and Perspectives**

**Health Policy:**

**Scott Flinn, MD** – Regional Medical Director, Blue Shield of California; Co-Founder Right Care University of Best Practices; Retired Navy Medical Officer

**Stanford Neurology:**

**Nirali Vora, MD** - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Associate Prof., Neurology, School of Medicine, Stanford University; Director, Global Health Neurology; Program Director, Adult Neurology Residency, School of Medicine, Stanford University

**UCSF Cardiology:**

**Eveline Stock, MD** - Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Prof., Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, UCSF

6:00 p.m.

**Wrap up and Announcements**

## Hattie Rees Hanley, MPP

**Director and Co-Founder, Right Care Initiative, UC Berkeley School of Public Health, Center for Healthcare Organizational and Innovation Research**

Ms. Hanley co-founded the Right Care Initiative in 2007 with the Deans of the University of California, Berkeley and UCLA's Schools of Public Health, clinical experts, and State of California leadership to improve patient outcomes in high yield areas for preventing disability and death, where the science is clear, but the uptake is uneven. The Right Care Initiative is a public-private, charitably-funded collaborative effort that has thus far worked in the areas of prevention and better management of Hospital Acquired Infections (HAI), heart attacks, strokes, diabetes and heart failure. Ms. Hanley has directed the initiative since its inception, in close collaboration with leading experts in the field. The hallmark of her public policy career is bridging across the disparate arenas of business, government, health care delivery, science and academia. Ms. Hanley received her Master's degree in Public Policy from Harvard University's John F. Kennedy School of Government, after studying health economics and pre-medical coursework at UC Davis. Since that time, she has applied her background in science and public policy in the areas of clinical quality improvement, public health preparedness and improving laws to protect patients. She was instrumental in the negotiations and passage of the set of California laws known as the Patient Bill of Rights, which includes the right to a Second Medical Opinion and Independent Medical Review. The Right Care Initiative is a program within the UC Berkeley School of Public Health's Center for Health Organizational and Innovation Research (CHOIR). Ms. Hanley has been invited by the Centers of Disease Control and Prevention to be a founding member of the National Hypertension Roundtable.

**June-Wha Rhee, MD, FACC**

**Practicing Cardiologist with Specialty in Cardio-oncology; Instructor, Stanford Cardiovascular Institute, Stanford University School of Medicine**

Dr. Rhee is a general cardiologist with specialized clinical and research training in cardiovascular drug toxicity and pharmacogenomics. She completed clinical cardiology fellowship and internal medicine residency training at Stanford University School of Medicine. During her post-doctoral training, Dr. Rhee's research focused on elucidating cardiotoxic effects of iron overload and of multiple chemotherapeutic agents using patient-specific induced pluripotent stem cells (iPSCs) derived models. Her current research employs clinical data, population genomics, and patient-derived iPSCs models to study genetic determinants and mechanisms of drug-induced cardiovascular toxicities. Dr. Rhee's clinic sees cardio-oncology patients and focuses on devising new methods for minimizing cardiovascular complications in that population.

**Marilyn Stebbins, PharmD**

**Professor & Vice-Chair of Clinical Innovation, Department of Clinical Pharmacy,  
University of California, San Francisco**

Marilyn Stebbins completed her Pharm.D. at UC San Francisco School of Pharmacy in 1988. After the completion of her Pharmacy Practice Residency at the UC Davis Medical Center she spent 7 years developing and implementing pharmacist-run clinics at the VA Outpatient Clinic in Sacramento. As faculty in the School of Pharmacy since 1996, Dr. Stebbins' work has focused on developing innovative practice models in the physician group practice setting. Since the passage of the Affordable Care Act and the need for more community-based providers, her goal has been to extend her work in the physician group setting and to develop innovative team-based practice models in the ambulatory and community pharmacy setting as well as in transitions of care. Her current research interests are in comprehensive medication management and the role of the pharmacist on the care team in all care settings.

**Edward M. Yu, MD, CMQ, CPPS, CPE**  
**Chief Quality Officer, Palo Alto Medical Foundation**

Dr. Edward Yu, MD, currently serves as the Chief Quality Officer of Palo Alto Medical Foundation. In this role, he directs clinical quality programs to promote evidence-based practices in the fields of preventive health, chronic disease management, population health, and health system innovations. Dr. Yu holds expertise in change management, strategic planning involving lean management systems and service line deployment. Dr. Yu has led multiple initiatives in population health management, value based care and evaluation sciences that have ultimately improved outcomes in clinical quality, patient experience, patient safety and clinic operations in multi-specialty group practice. In addition to his role as Chief Quality Officer, he is the current Chairman of the PAMF Regional Quality Improvement Steering Committee.

Dr. Yu is Family Medicine Board Certified and completed his residency at the UCLA David Geffen School of Medicine.

**Scott Flinn, MD**

**Regional Medical Director, Blue Shield of California; Co-Founder Right Care University of Best Practices; Retired Navy Medical Officer**

Dr. Flinn is a Regional Medical Director at Blue Shield of California where he focuses on improving the value of care delivered to Blue Shield members. Previously, Dr. Flinn was the Chief Medical Officer at Arch Health Partners, and he served 22 years in the US Navy. Highlights included two tours with the Navy SEALs, Medical Director for primary care at Naval Hospital San Diego, and Force Surgeon for Naval Surface Forces in charge of the health care for all Navy ships worldwide. A graduate of the University of Pittsburgh medical school, Dr. Flinn is a member of the American Academy of Family Practice and the American College of Physician Executives, becoming a Certified Physician Executive in 2013. He is board certified in Family Practice with a CAQ in Sports Medicine. Dr. Flinn formerly co-chaired The Right Care Initiative's 1st University of Best of Practices in San Diego.

**Nirali Vora, MD**

**Co-Chair, Right Care Initiative Silicon Valley University of Best Practices;  
Professor, Neurology, School of Medicine, Stanford University; Director, Global  
Health Neurology; Program Director, Adult Neurology Residency, School of  
Medicine, Stanford University**

Nirali Vora is a board-certified stroke neurologist, Associate Professor at Stanford, and a faculty affiliate of the Clinical Excellence Research Center. She provides comprehensive care for stroke and transient ischemic attack (TIA) patients, especially those with "cryptogenic" or undetermined cause for their disease. She has pioneered initiatives to improve stroke care through systems change and education on a regional and global level, including development of the first stroke unit in Zimbabwe. She is the Director of the Stanford Global Health Neurology program, as well as the Program Director of the Adult Neurology Residency Training program. She looks forward to continuing to work with patients and providers to prevent and better manage stroke, eliminate disparities in health care, and improve global neurology education.

**Eveline Oestreicher Stock, MD**

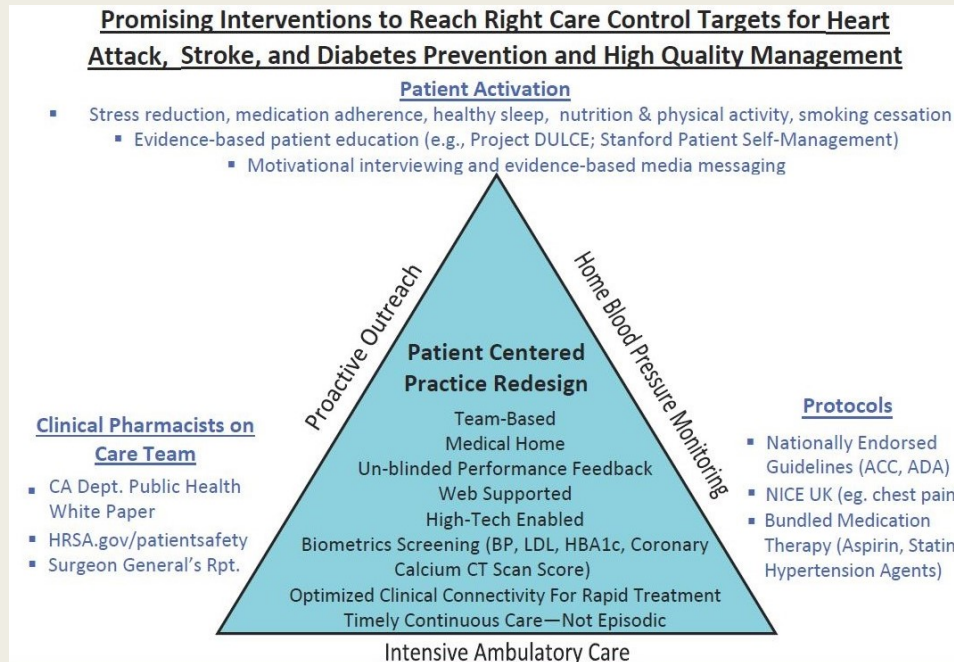

**Co-Chair, Right Care Initiative Silicon Valley University of Best Practices;  
Assistant Professor, Cardiology, School of Medicine, University of California, San  
Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of  
California, San Francisco**

Dr. Stock's expertise in Endocrinology and Cardiology at the University of California San Francisco have informed her exciting work in molecular cardiology. Dr. Stock is a leader in the field of lipoprotein metabolism, and the diagnosis and management of lipoprotein disorders for the prevention of atherosclerotic coronary heart disease. Her research interests include the role of lipoprotein subclasses as predictors of coronary artery disease and myocardial infarction. She is an Assistant Professor at UCSF, a practicing cardiologist and lipidologist, and a researcher at the Cardiovascular Research Institute at UCSF. She received her medical education at the Catholic University of Chile and completed her training in endocrine hypertension and residency at Harvard Medical School's Massachusetts General Hospital. She looks forward to continuing to work with the Right Care Initiative as a means of closing the gap between science and practice to get to zero heart attacks and strokes, especially in vulnerable populations.

# Thank you!

## Upcoming Virtual University of Best Practices:

**June 8, 2020 - 12:00PM – 2:30PM**

- COVID-19 Cardiovascular Nexus Update: **William J. Bommer, MD, FACP, FACC** - Chairman, Right Care Initiative Capital Region; Executive Committee, American College of Cardiology, CA Chapter; Division of Cardiovascular Medicine, UC Davis
- UCD Tele-Health in the Era of COVID-19: **James Marcin, MD, MPH** - Professor, Pediatric Critical Care UC Davis Children's Hospital; Director, Center for Health and Technology
- USC Medical Innovation (Covid 19 – Disruptive Innovation): **Carol Peden, MB ChB, MD, FRCA, FFICM, FFMLM, MPH** - Los Angeles UBP Co-Chair, Right Care Initiative; Executive Director, USC Center for Health System Innovation, Professor, Department of Anesthesiology, USC Keck School of Medicine
