

4th Annual Right Care Initiative Dean's Clinical Quality Improvement Leadership Summit

Monday, October 3, 2011.

In 2008, the Right Care Initiative (RCI) posed a challenge to the health plans and medical groups of California to reach the national 90th percentile of performance in cardiovascular and diabetes measures within three years. For the first time, researchers affiliated with the RCI and the Integrated Medical Association have analyzed California's medical group scores for comparison to RCI goals, and found that your group has met or exceeded the following levels of achievement based on national HEDIS 90th Percentile targets:

70% of patients with cardiovascular conditions with lipids controlled: LDL-C < 100 mg/dL

70% of diabetic patients with blood sugar controlled: HbA1c <8

55% of diabetic patients with lipids controlled: LDL-C < 100 mg/dL

The following eleven California medical groups that have met all three of these important control targets for improving patient outcomes:

1. Arch Health Partners
2. Edinger Medical Group
3. John Muir Physicians Network
4. Mercy Medical Group/CHW Medical Foundation
5. PAMF- Mills Peninsula Division
6. Scripps Clinic Medical Group
7. Sharp Rees-Stealy Medical Group
8. St. Joseph Heritage Medical Group
9. St. Jude Heritage Medical Group
10. Sutter Gould Medical Group
11. UCLA Medical Group
