

Hattie Rees Hanley, MPP

Director and Co-Founder, Right Care Initiative, Center for Healthcare Organizational and Innovation Research, UC Berkeley School of Public Health

Ms. Hanley co-founded the Right Care Initiative in 2007 with the Deans of the University of California, Berkeley and UCLA's Schools of Public Health, clinical experts, and State of California leadership to improve patient outcomes in high yield areas for preventing disability and death, where the science is clear, but the uptake is uneven. The Right Care Initiative is a public-private,

charitably-funded collaborative effort that has thus far worked in the areas of prevention and better management of Hospital Acquired Infections (HAI), heart attacks, strokes, diabetes and heart failure. Ms. Hanley has directed the initiative since its inception, in close collaboration with leading experts in the field. The hallmark of her public policy career is bridging across the disparate arenas of business, government, health care delivery, science and academia. Ms. Hanley received her Master's degree in Public Policy from Harvard University's John F. Kennedy School of Government, after studying health economics and pre-medical coursework at UC Davis. Since that time, she has applied her background in science and public policy in the areas of clinical quality improvement, public health preparedness and improving laws to protect patients. She was instrumental in the negotiations and passage of the set of California laws known as the Patient Bill of Rights, which includes the right to a Second Medical Opinion and Independent Medical Review. The Right Care Initiative is a program within the UC Berkeley School of Public Health's Center for Health Organizational and Innovation Research (CHOIR). Ms. Hanley has been invited by the Centers of Disease Control and Prevention to be a founding member of the National Hypertension Roundtable.

William J. Bommer, MD, FACP, FACC

**Statewide Chairman, Right Care Initiative University of Best Practices;
Specialty Delegate, California American College of Cardiology and
California Medical Association; Director, California ePCI Program;
Director, Prevention Forward Program and Professor of Medicine,
Division of Cardiovascular Medicine, University of California, Davis**

Dr. Bommer's service to the American College of Cardiology includes his current role on the California Executive Committee; as well as former roles as President, Vice-President, Governor, and Member of the Board of Governors. As an accomplished UC Davis Clinical Professor of Medicine, he directs UC Davis Cardiology's Noninvasive Services; directs the Cardiology Fellowship Training Program and sees patients in the Coronary Critical Care Unit. As the longest-tenures UCD

Training Director, he has trained over 200 practicing cardiologists. Dr. Bommer has been the Principal Investigator or Co-Investigator of multiple NIH, NHLBI, and international research trials. He is a member of 50 international, national, state, and university education commissions and committees. Dr. Bommer founded and is a Board Member of numerous hardware and software startup companies and is an inventor of patents for xerography, color-flow ultrasound imaging, and contrast echocardiography. His public service includes quality improvement consulting with the State of California and directs multiple programs including CA Pilot Percutaneous Coronary Intervention (PCI) (offsite) Program, CA Elective PCI (offsite) Program, and CA Cardiac Surgery and Intervention Outcomes Program. He has authored over 250 scientific publications, received over 100 Honors and Awards, presented over 1000 papers at International, National, and Statewide meetings, and coauthored California Legislation including SB 357 and SB 906. A Physics and Chemistry graduate of Cornell University, he received his medical degree from the State University of New York. He is an Honorary Lifetime Member of the British Cardiovascular Society, an avid skier, and a marathon runner.

Hilary K. Wall, MPH

Senior Health Scientist, Million Hearts, Centers for Disease Control and Prevention

Hilary Wall is a Senior Scientist in the Division for Heart Disease and Stroke Prevention at the Centers for Disease Control and Prevention. Ms. Wall serves as the Science Lead for the Million Hearts initiative. In this role, she leads a portfolio of scientific activities related to health care systems change, health information technology, and their intersection with public policy.

For almost 20 years, Ms. Wall has created evidence-based tools for and provided technical assistance to public health professionals, clinicians, and community-based organizations in cardiovascular disease prevention.

Jean Shahdadpuri, MD, MBA

Emeritus Sr. Vice President for Medical Affairs, HealthNet/Centene; Managing Director, Nikai

Dr. Jean Shahdadpuri is a pediatrician by training and an entrepreneur with the sole purpose of making a difference in the lives of the people around her. She has a passion for innovation and driving change. She has transformed the face of global companies right from starting the Young Entrepreneurs Incubation Centre at University of California to leading the Opioid Collaborative Task Force and the Right Care Initiative for Diabetics with Heart Disease for the entire State of California.

She has been a potent force in achieving successful outcomes in disease management, population health and behavioral health management in the US. She comes with a diverse experience of 28 years spanning various geographies and industries such as healthcare, technology and trading.

Dr. Shahdadpuri had reached the acme of her career in corporate US, where she was working in the C-suite at Centene Corporation, a FORTUNE® 50 multi-national healthcare enterprise with a revenue of over \$115Billion. She moved back to be with her family after realizing how COVID 19 could change the lives of many and how important it is to cherish the time with your family.

She says, *“Define success on your own terms, achieve it by your own rules, and build a life you’re proud to live.”*

She is avid Sitar player and is an advanced certified scuba diving instructor.

Oliver Brooks, MD

Co-Chair and Hypertension Champion, Right Care University of Best Practices; Immediate Past President, National Medical Association; Chief Medical Officer, Watts Healthcare

Dr. Oliver Brooks is the Immediate Past President of the National Medical Association. In addition, he is currently the Chief Medical Officer and past Chief of Pediatric and Adolescent Medicine at Watts Healthcare Corporation in LA, California (CA). He is also a Medical

Director for L.A. Care Health Plan, one of the nation's largest Medicaid managed care plans whose mission is "to provide access to quality health care for Los Angeles County's vulnerable and low-income communities and residents". He holds staff appointments at Centinela Hospital in Inglewood, CA and at Martin Luther King Community Hospital in South Los Angeles, CA where he is Vice-Chair of the OB/Pediatrics Department and is a member of its Executive Committee. Dr. Brooks is the Chairman of the Community Clinic Association of Los Angeles County, a consortium of 30 community health centers in the southern California area and serves as the Medical Director of the Jordan and Locke High School Wellness Centers. Dr Brooks received his undergraduate degree in biology from Morehouse College in Atlanta, Georgia in 1977, graduating in three years and his medical degree in 1981 from Howard University College of Medicine. He completed a residency in Pediatrics at Children's Hospital-Oakland, where he practiced for four years before accepting a position at Watts Healthcare Corporation. At the state and local level, he served as Past President of the Golden State (CA) Medical Association and Past President of the Miller-Lawrence Medical and Dental Society.

Scott Flinn, MD

Co-Chair, Right Care Initiative University of Best Practices; Regional Medical Director, Blue Shield of California; Former US Navy Undersea Medical Officer with Navy Seals

Scott Flinn, MD, is a Regional Medical Director at Blue Shield of California where he focuses on improving the value of care delivered to Blue Shield members. Previously, Dr. Flinn was the Chief Medical Officer at Arch Health Partners and served 22 years in the US Navy. Highlights included two tours with the Navy SEALs, Medical Director for primary care at Naval Hospital San Diego, and Force Surgeon for Naval Surface Forces in charge of the health care for all

Navy ships worldwide. A graduate of the University of Pittsburgh medical school, Dr. Flinn is a member of the American Academy of Family Practice and the American College of Physician Executives, becoming a Certified Physician Executive in 2013. He is board certified in Family Practice with a CAQ in Sports Medicine. Dr. Flinn is a member of the Right Care Technical Expert Group, and co-founder of the Bay Area Silicon Valley University of Best Practices. He formerly co-chaired the Right Care Initiative's 1st University of Best of Practices in San Diego.

Cindy Giambrone, PharmD

Co-chair, Right Care Initiative Heart Failure Work Group; Director, Performance Improvement and ACO Pharmacy Risk, MemorialCare Foundation and Medical Group

Dr. Giambrone currently serves as Director of Performance Improvement and Accountable Care Organization (ACO) Pharmacy Risk for the MemorialCare Medical Foundation. Her responsibilities include building and overseeing programs and processes related to managing ACO pharmacy risk and improving quality metric scores for employers and health plans. She has a long-standing interest in the management of Congestive Heart Failure (CHF) resulting

from her professional and personal experience.

Robert Kaplan, PhD

Founding Co-Leader, Right Care Technical Expert Group; Research Director, Clinical Excellence Research Center, Stanford University; Former Chief Science Officer US HHS AHRQ; Former Associate Director, National Institutes of Health

Robert M. Kaplan is a co-founder and Co-Chair of the Right Care Initiative Technical Expert Group. He has served as Chief Science Officer at the US Agency for Health Care Research

and Quality (AHRQ) and Associate Director of the National Institutes of Health, where he led the behavioral and social sciences programs. He is also a Distinguished Research Professor of Health Services and Medicine at UCLA, where he previously led the UCLA/RAND AHRQ health services training program and the UCLA/RAND CDC Prevention Research Center. He was Chair of the Department of Health Services from 2004 to 2009. From 1997 to 2004 he was Professor and Chair of the Department of Family and Preventive Medicine, at the University of California, San Diego. He is a past President of five different national or international professional organizations and has served as Editor-In-Chief for two academic journals. His 20 books and over 565 articles or chapters have been cited more than 58,000 times (H-index>108). Google scholar includes him in the list of the most highly cited authors in science. Kaplan was elected to the National Academy of Medicine (formerly the Institute of Medicine) in 2005. He is currently a faculty member at the Stanford School of Medicine Clinical Excellence Research Center (CERC).

Joseph Sky, MD, FACP, FACC

Co-Chair, Right Care Initiative University of Best Practices; Chief of Preventive Cardiology, Associate Chief of Staff, David Grant Medical Center, US Air Force

Joseph Sky, MD, is the Chief of Cardiology and Medical Director of the Heart, Lung and, Vascular Center at David Grant USAF Medical Center serving veterans, active duty military, and their families at Travis Air Force Base. Dr. Joseph Sky was raised in a community closely connected to one of the Blue Zones areas and is currently an active speaker for the Loma Linda Project. Dr. Sky received his bachelor of science from Pacific Union College and his medical degree from Loma Linda University (1999). He completed his training in internal medicine and cardiology in the US Air Force. Prior to becoming a cardiologist, Dr. Sky served as a Flight Medicine Physician and later Chief of the Internal Medicine Branch of the US Air Force School of Aerospace Medicine where he monitored and kept our nation's pilots and those of allied air forces healthy and fit for duty. He is a specialist in integrating modern medical treatments with evidence-based preventive medicine to safely allow military pilots, unmanned aircraft operators, and commercial pilots with cardiovascular disease to continue flying. While Dr. Sky fully embraces western medicine, his enjoyment is finding patients willing to use diet and lifestyle as medicine. He returned from a tour of duty in Iraq in 2018 and is excited to be practicing at a time when science shows the proven value of complementary preventive cardiology.

Eveline Oestreicher Stock, MD

Co-Chair, Right Care Initiative Silicon Valley University of Best Practices; Assistant Professor, Cardiology, School of Medicine, University of California, San Francisco; Cardiologist, Cardiovascular Care & Prevention Center, University of California, San Francisco

Dr. Stock's expertise in Endocrinology and Cardiology at the University of California San Francisco have informed her exciting work in molecular cardiology. Dr. Stock is a leader in the field of lipoprotein metabolism, and the diagnosis and management of lipoprotein disorders for the prevention of atherosclerotic coronary heart disease. Her research interests include the role of lipoprotein subclasses as predictors of coronary artery disease and myocardial infarction. She is an Assistant Professor at UCSF, a practicing cardiologist and lipidologist, and a researcher at the Cardiovascular Research Institute at UCSF. She received her medical education at the Catholic University of Chile and completed her training in endocrine hypertension and residency at Harvard Medical School's Massachusetts General Hospital. She looks forward to continuing to work with the Right Care Initiative as a means of closing the gap between science and practice to get to zero heart attacks and strokes, especially in vulnerable populations.
